VISMAY RAUT

Fourth Year B.Tech | Computer Science | MIT ADT UNIVERSITY
vismay.raut22@gmail.com | (+91)7841859288

EDUCATION

UNDERGRADUATE (IT)
MIT ADT PUNE | EXPECTED 2026
CPI: 7.9/10.0

INTERMEDIATE (HSC)
NIRMALA MEMORIAL FOUNDATION COLLEGE OF SCIENCE | 2022
Percentage: 65/100

MATRICULATION (SSC)
SWAMI VIVEKANAND INTERNATIONAL SCHOOL | 2020
Percentage: 90/100

SKILLS

PROGRAMMING LANGUAGES
- Python
- C++
- SQL

TOOLS-FRAMEWORKS
- PyTorch
- TensorFlow
- OpenCV
- Langchain
- NLP
- SVM
- CNN

ACHIEVEMENTS

- Selected for **IEEE CIS Technical Team**, contributing to AI/ML research initiatives and technical workshops.

EXTRA CURRICULARS

BUILD AND GROW2.0 | NMIMS MUMBAI

- Participated in a competitive hackathon focused on building innovative technology solutions within a limited time frame.

EXPERIENCE

AI/ML DEVELOPER INTERN | Micro Logics | DECEMBER 2025 - FEB 2026
- Developed an AI-powered OCR system for recognizing industrial weight plate codes using **TrOCR, PyTorch**, and **OpenCV**.
- Designed an image preprocessing and detection pipeline that **reduced processing time from 15–30 seconds to milliseconds**.
- Built a **Gradio-based web interface and CLI tools** for real-time prediction and batch image processing.

AI DEVELOPER INTERN | IS360 | JUNE 2024 - JUNE 2025
- Build EEG authentication pipeline with 92%+ biometric accuracy for secure medical access.
- Reduced neural noise by 37% using **custom signal filtering** (SciPy + FFT + wavelet denoising).
- Designed signal denoising, feature extraction, and real-time inference pipeline.

SALES AND MARKETING INTERN | VRFOOD | JUNE 2023 - SEPT 2023
- Increased retailer onboarding by **~28% within three months** through direct sales outreach and local campaigns.
- Helped improve product visibility and market reach by coordinating with distributors and vendors.

PROJECTS

SKILLENS | AI RESUME SCREENER
AI system that analyzes resumes and matches them with job descriptions.
- Implemented **LLM-based resume analysis using OpenAI API and LangChain.**
- Applied **vector embeddings for semantic skill matching** between resumes and job descriptions.
- Built backend APIs using **Node.js and JWT authentication** for secure resume processing.
- Designed a **resume parsing pipeline to extract key sections such as skills, experience, and education** for structured analysis.

NEURALOCK |EEG BIOMETRIC AUTHENTICATION
Machine learning-based authentication system using EEG brain signals.
- Built ML models (**CNN, SVM**) to identify unique neural patterns.
- Implemented signal preprocessing and feature extraction using **NumPy, SciPy, and OpenBCI SDK**.
- Achieved **93–96% authentication accuracy** in controlled testing environments.
- Designed a **real-time EEG signal processing pipeline including filtering, noise reduction, and feature extraction**.
